

Define your web, mobile and business applications through functional prototypes

Visualize the future of your applications with our Application Simulator

Visualize and validate your applications before developing them

How do we like to explain it?

- Solutions for visual communication between business areas and IT
- Could you imagine VOLKSWAGEN producing cars without designing prototypes and testing these prototypes?
- Could you imagine IKEA producing furnitures without designing prototypes or proof of concepts ?

Thanks to our **prototyping and simulations to define software**, companies can:

- ➔ Reduce costs, avoiding rework
- ➔ Avoid risks and failures in your projects
- ➔ Prevent changes in critical stages of projects
- ➔ Speed up project development

Products

 **Justinmind Prototyper:** Prototyping and simulation tool

 **Justinmind Usernote:** allows to publish prototypes, get feedback from users and test application prototypes with web browsers

For what kind of software?

➔ Web Applications and Websites

➔ Portals, Intranets

➔ Smartphones (Iphone, Android, Ipad, Blackberry ...)

➔ ERP (SAP, Oracle ...)

➔ Desktop applications.

	Professional	Enterprise
Rich interactions	✓	✓
Custom widgets	✓	✓
Templates	✓	✓
Masters	✓	✓
Forms and datagrids simulation	✓	✓
Export HTML/Javascript	✓	✓
Generate specification documents	✓	✓
Customization of document generation		✓
Requirements management		✓
Import real data from csv files		✓

Allows to capture and manage feedback from users and customers and perform user tests

- ➔ Publish prototypes
- ➔ Review and validate prototypes with the user's web browsers
- ➔ Conversational annotations over the elements of a prototype
- ➔ User testing tools integration

➔ Functional Team ↔ Users

Team leaders,
Business Analysts, UX Designers ...

- Visual communication
- Business – IT alignment
- Avoid misunderstandings

Key users

➔ Functional Team ↔ Development Team

Team leaders,
Business Analysts, UX Designers ...

- Prevent changes in critical stages
- Speed up time-to-market
- Avoid risks

Internal or external
development team
